Spalling Hammer

Category: **Construction & Masonry** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Spall Hammer

What it is used for

To remove loose or damaged concrete and masonry fragments during surface preparation and repair work.

How to handle

- Inspect the hammer head, striking face, handle, and joints for cracks or looseness.
- Wear eye or face protection, hearing protection, gloves, safety footwear, and suitable respiratory protection for dust.
- Check the work area for hidden services and unstable material, and keep bystanders at a safe distance.
- Use controlled blows to remove only the intended loose material and avoid striking near exposed reinforcement or services without authorisation.
- Collect debris safely and inspect the hammer for damage after work.

Storage

- Store clean and dry in a designated construction-tool rack.
- Keep the striking face protected and the handle secured against accidental damage.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
