Splint

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Malleable Splint Set; Splint; Splints

What it is used for

To support and immobilise a suspected injured limb or body part until appropriate medical assessment and treatment are available.

How to handle

- Use the splint only within the user's first-aid training and applicable clinical procedures.
- Assess the scene for safety and check circulation, sensation, and movement before and after application when appropriate.
- Choose a suitable splint size and shape; pad rigid edges and avoid unnecessary movement of the injured area.
- Secure the splint without excessive tightness and do not attempt to straighten a visibly deformed limb.
- Seek urgent medical care for suspected fractures or serious injuries and monitor the person while awaiting assistance.

Storage

- Store clean and dry in a labelled first-aid or clinical equipment kit.
- Keep reusable splints disinfected according to facility procedures and separate from contaminated supplies.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
