Water Level

Category: **Construction & Masonry** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Water level; Water Level Tube; Water leveller

What it is used for

To check and transfer level between points using a water level tube or water leveller.

How to handle

- Inspect the tube for cracks, leaks, and blockages before use.
- Fill the tube with clean water and remove trapped air bubbles; keep both ends open and upright as appropriate for the design.
- Place the ends at the points being compared and allow the water to settle.
- Read the water surfaces at eye level and mark the reference points accurately.
- Drain and wipe the tube after use; avoid kinks and contamination.

Storage

- Drain, dry, and coil the tube loosely without sharp bends.
- Store in a clean, dry location away from sharp tools and direct sunlight.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
