Wire Cutter

Category: **Hand Tools - Cutting & Shaping** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Cutting Pliers; Wire Cutter; Wire Cutters

What it is used for

To cut suitable wires and small conductors using cutting pliers or a wire cutter.

How to handle

- Inspect the cutting edges, pivot, and insulated handles for damage or looseness.
- Choose a cutter rated for the wire material and size; never use it on live electrical conductors.
- Wear eye protection and keep the wire end directed away from people.
- Position the wire near the cutting edge and squeeze the handles steadily; do not twist or overload the tool.
- Wipe the cutter clean after use and check the cutting edges.

Storage

- Clean and dry the cutter; apply a light protective lubricant to the pivot if recommended by the manufacturer.
- Close the jaws and store in a dry tool drawer away from children.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
