Air Cushion

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Air Cushion

What it is used for

To provide cushioning and support for comfort or pressure redistribution when appropriate for the person's needs.

How to handle

- Inspect the cushion for leaks, tears, contamination, and valve damage before use.
- Confirm the cushion type and recommended use; follow clinical guidance when used for pressure management or patient care.
- Position the cushion correctly on a stable, compatible seat or surface and adjust inflation only as directed by the manufacturer.
- Help the user sit or lie in a safe, comfortable position and check stability and skin comfort as appropriate.
- Clean and disinfect according to the product instructions and facility policy.

Storage

- Clean and dry the cushion completely before storage; keep valves closed as directed.
- Store in a clean, dry area away from sharp objects, excessive heat, and heavy loads.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
