Anemometer

Category: **Measuring & Marking Tools** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Anemometer

What it is used for

To measure air or wind speed for educational, environmental, or workplace monitoring activities.

How to handle

- Inspect the anemometer, sensor, display, and battery compartment for damage.
- Select the appropriate measurement mode and units according to the instrument manual.
- Place the sensor in the airflow as specified, away from obstructions and body interference where possible.
- Allow the reading to stabilize, then record the value, units, location, and relevant conditions.
- Switch off the instrument after use and clean the sensor gently without damaging moving parts.

Storage

- Switch off the instrument and remove batteries for long-term storage if recommended by the manufacturer.
- Store in its protective case in a clean, dry place away from dust, moisture, and impact.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
