Fish Tape

Category: **Hand Tools - Fastening & Gripping** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Fish Tape

What it is used for

To guide and pull suitable wires through conduit or enclosed wiring routes during electrical installation work.

How to handle

- Inspect the fish tape, reel, leader, and handle for kinks, fraying, corrosion, or damage.
- Confirm the circuit is de-energized and follow electrical safety procedures before working in conduit.
- Feed the leader carefully through the conduit without forcing it around obstructions.
- Attach the wire securely to the leader and pull steadily while a helper manages the cable where appropriate.
- Avoid contact with energized conductors and retract the tape carefully after the pull.

Storage

- Wipe the tape clean and retract it fully into its reel after use.
- Store in a dry tool cabinet away from moisture, corrosive chemicals, and sharp bends.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
