Hand Rotary Duster

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Hand rotary duster

What it is used for

To distribute suitable dust formulations over plants or target areas using a hand-operated rotary duster, following product-label instructions.

How to handle

- Inspect the hopper, handle, rotating mechanism, outlet, and seals for damage or blockage.
- Read the product label and wear the specified protective equipment before loading any dust formulation.
- Fill the hopper only with a product approved for the intended use and avoid creating airborne dust.
- Operate the handle steadily and direct the outlet away from people, animals, food, and water sources.
- Empty and clean the duster safely after use according to the product label; do not blow dust out by mouth.

Storage

- Clean the device according to the product label and allow it to dry completely.
- Store empty in a labelled, dry, secure area away from food, children, and incompatible chemicals.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
