Hot Water Bottle

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Hot Water bag; Hot Water Bottle

What it is used for

To provide gentle external warmth for comfort when appropriate and safe for the user.

How to handle

- Inspect the bottle, stopper, seams, and cover for cracks, leaks, or deterioration before every use.
- Use hot but not boiling water, following the manufacturer's instructions; fill only to the recommended level and expel excess air as directed.
- Close the stopper securely and check for leakage before placing the bottle inside its cover.
- Wrap the bottle in its protective cover and apply it to the intended area without direct prolonged skin contact.
- Check the skin regularly and remove the bottle if discomfort, excessive heat, redness, or irritation occurs; use extra caution with people who have reduced sensation.

Storage

- Empty, rinse if appropriate, and dry the bottle completely after use; follow the manufacturer's storage instructions.
- Store with the stopper loosened or removed if specified by the manufacturer, away from direct sunlight and heat.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
