Inspection Mirror

Category: **Automotive** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Mirror (inspection)

What it is used for

To inspect hidden, obstructed, or hard-to-see vehicle components without unnecessary disassembly.

How to handle

- Inspect the mirror, handle, extension shaft, joints, and any built-in light for damage.
- Park the vehicle securely, apply the parking brake, and allow hot components to cool before inspection.
- Extend and angle the mirror to view the required area while keeping hands clear of moving or hot parts.
- Use adequate lighting and avoid placing the mirror or hands near belts, fans, or other moving components.
- Clean the mirror after use and retract the handle carefully.

Storage

- Wipe the mirror clean and dry; retract the shaft if adjustable.
- Store in a padded tool holder or designated drawer to protect the mirror surface from scratches.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
