Knee Pads

Category: **Safety & PPE** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Additional protective equipment, such as knee pads and gaiters for rugged terrain; Knee pad

What it is used for

To protect the knees from impact, abrasion, and discomfort during kneeling or work on rough surfaces.

How to handle

- Inspect the pads, straps, fasteners, and protective shells for tears, cracks, or worn areas.
- Select pads suitable for the task and ensure they fit securely without restricting circulation or movement.
- Position the protective area over each kneecap and fasten the straps comfortably.
- Check the fit during work and reposition the pads if they slip; do not use damaged pads for protection.
- Clean and dry the pads after use, especially if exposed to dirt, sweat, or chemicals.

Storage

- Clean and dry the pads thoroughly before storing.
- Store flat or hang in a ventilated PPE area away from direct heat and chemical contamination.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
