Manikin

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Human Body Manikin; Little Anne

What it is used for

To practise clinical skills, patient assessment, or CPR techniques on a training manikin without using a real patient.

How to handle

- Inspect the manikin body, joints, airway components, removable parts, and accessories for damage and cleanliness.
- Set up the manikin according to the training scenario and the manufacturer's instructions.
- Use only approved training procedures and compatible accessories; follow instructor guidance during CPR or clinical simulations.
- Avoid sharp instruments or fluids unless the manikin is designed for them, and do not apply excessive force to joints or connectors.
- After training, clean and disinfect contact surfaces and reusable components according to the manufacturer and institutional protocol.

Storage

- Clean, disinfect, and dry the manikin and accessories thoroughly before storage.
- Store in the designated clean area, protect joints and airway parts, and keep removable components together.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
