Medicine Ball

Category: **Sports & Physical Education** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: 1 kg Medicine Ball; Medicine Balls

What it is used for

To perform strength, coordination, balance, and conditioning exercises using a weighted medicine ball.

How to handle

- Inspect the ball surface, seams, and grip for cracks, leaks, or other damage.
- Choose a ball weight appropriate for the participant's ability and the planned exercise.
- Use a clear, non-slip exercise area and demonstrate correct posture and movement before starting.
- Keep a secure grip, use controlled movements, and maintain adequate distance from others during throws or partner drills.
- Do not use a damaged ball; stop if pain, dizziness, or loss of control occurs.

Storage

- Wipe the ball clean and dry after use.
- Store on a stable sports-equipment rack or in a designated bin away from sharp objects and excessive heat.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
