Oxygen Cylinder Key

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Oxygen Key

What it is used for

To operate a compatible oxygen-cylinder valve only when authorized and trained, following the facility's oxygen safety procedure.

How to handle

- Inspect the key for cracks, deformation, corrosion, or incorrect fit before use.
- Confirm the cylinder is correctly identified, secured upright, and fitted with the appropriate regulator and approved accessories.
- Keep oil, grease, flames, sparks, and smoking materials away from oxygen equipment; never lubricate the key or valve.
- Use only the manufacturer-approved key and operate the valve as instructed by trained personnel; do not force a stuck valve.
- Close or secure the valve according to the prescribed procedure and report leaks, damage, or abnormal resistance immediately.

Storage

- Wipe the key clean and dry after use and inspect it for wear.
- Store in its designated labelled location away from oils, grease, heat, and unauthorized access.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
