Pick Glass

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Pick glass

What it is used for

To inspect or magnify small details in textile, craft, or other close-up work, according to the instrument design.

How to handle

- Inspect the glass, lens, frame, and handle for cracks, chips, loose parts, or distortion.
- Hold the instrument by its handle or frame and position it over the area to be examined.
- Adjust the distance and lighting until the detail is clearly visible; avoid touching delicate surfaces with the glass.
- Keep the glass away from eyes at unsafe distances and do not focus sunlight through a magnifying lens.
- Wipe the lens gently with an appropriate lens-cleaning cloth after use.

Storage

- Clean the lens gently and place a protective cap or cover over it if provided.
- Store in a padded case in a dry place to prevent scratches, breakage, and dust buildup.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
