Pipe Cutter

Category: **Plumbing & Pipe Fitting** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Pipe cutter; Tube cutter

What it is used for

To cut compatible pipes or tubes cleanly to the required length for plumbing or installation work.

How to handle

- Inspect the cutter wheel or blade, rollers, frame, handle, and adjustment screw for damage or wear.
- Confirm the cutter is suitable for the pipe material and diameter; secure the pipe on a stable support.
- Measure and mark the cutting location and wear suitable eye and hand protection.
- Align the cutter with the mark, tighten gradually, and rotate or operate it according to the tool design without excessive force.
- Remove burrs with a suitable deburring tool and check the cut edge before fitting the pipe.

Storage

- Wipe the cutter clean, remove metal or plastic shavings, and protect the blade or wheel.
- Retract or lock the cutting mechanism as designed and store in a dry tool cabinet.
