Pipe Threading Die

Category: **Plumbing & Pipe Fitting** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Pipe Die Set - with D/E Handle(pi pe wrench)

What it is used for

To cut external threads on compatible pipe ends so that threaded fittings can be installed securely.

How to handle

- Inspect the die, die head, handle, and cutting edges for damage, wear, or missing components.
- Select the correct die size and type for the pipe material and thread specification.
- Secure the pipe in a suitable pipe vice and wear eye protection and appropriate gloves where safe for the task.
- Align the die squarely with the pipe end, apply the recommended cutting lubricant, and turn the handle steadily according to the tool design.
- Remove the die carefully, clean the threads, and check thread quality and fit without forcing incompatible fittings.

Storage

- Clean the die and remove metal chips and lubricant residue after use.
- Dry and lightly protect cutting surfaces as recommended; store the die and handle together in a labelled case.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
