Punch

Category: **Hand Tools - Striking & Digging** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Punches; Straight or ejecto punch

What it is used for

To mark, align, drive, or eject pins and small components using a punch suitable for the task.

How to handle

- Inspect the punch tip and striking head for mushrooming, cracks, bending, or other damage.
- Select the correct punch type and size for the material and task; secure the workpiece on a stable support.
- Wear eye protection and position the punch securely on the intended mark or pin.
- Strike the punch with a suitable hammer using controlled blows, keeping hands clear of the impact area.
- Stop if the punch slips or deforms; do not use a damaged punch or strike hardened punches with an unsuitable hammer.

Storage

- Wipe the punch clean and inspect the tip and striking head after use.
- Store by size in a dry tool rack or case with tips protected from damage and accidental contact.
