Putty Knife

Category: **Construction & Masonry** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Filling Knife; Putty Knife

What it is used for

To spread filler, putty, or similar compounds and smooth surfaces during repair or finishing work.

How to handle

- Inspect the blade, handle, and joint for rust, cracks, looseness, or a bent edge.
- Select a blade width suitable for the repair and prepare the surface according to the compound instructions.
- Load a small amount of material onto the blade and spread it using smooth, controlled strokes.
- Keep fingers away from the blade edge and avoid using excessive force that could damage the surface.
- Remove compound residue and clean the blade before the material hardens.

Storage

- Clean and dry the blade thoroughly after use to prevent residue buildup and corrosion.
- Store with the blade protected in a dry tool rack or drawer away from moisture.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
