Radius Gauge

Category: **Measuring & Marking Tools** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Radius Gauge

What it is used for

To check the radius of curved edges, corners, and profiles during inspection or fabrication.

How to handle

- Inspect the gauge leaves for rust, bends, burrs, or damaged edges.
- Select the leaf with the required radius and ensure the workpiece is clean.
- Place the leaf gently against the curve and check for gaps or rocking without forcing it.
- Compare the fit under suitable lighting and record the result if required.
- Wipe the gauge clean after use and avoid using it as a scraper or cutting tool.

Storage

- Wipe dry and apply a light protective coating if recommended for the gauge material.
- Fold the leaves into their holder and store in a dry case to prevent rust and bending.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
