Ranging Rod

Category: **Measuring & Marking Tools** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Ranging rod

What it is used for

To mark survey stations and help establish straight lines or alignment during land surveying.

How to handle

- Inspect the rod, painted bands, tip, joints, and fittings for damage or looseness.
- Place the rod vertically at the designated survey point using a suitable support when needed.
- Keep the rod visible to the survey team and align it according to the surveyor's instructions.
- Avoid overhead power lines, vehicle routes, and unstable ground when carrying or positioning the rod.
- Clean off soil after use and inspect the rod before returning it to storage.

Storage

- Wipe the rod clean and dry, especially at joints and metal fittings.
- Store horizontally on suitable supports or in its designated rack, away from bending and moisture.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
