Sharpening Stone

Category: **Hand Tools - Cutting & Shaping** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Carbound um Stone (Emery)

What it is used for

To sharpen compatible hand-tool edges using a suitable abrasive stone or emery stone.

How to handle

- Inspect the stone for cracks, chips, uneven wear, or looseness in its holder.
- Confirm the stone type and grit are suitable for the tool and follow the manufacturer's instructions for dry or lubricated use.
- Secure the stone on a stable surface and wear eye protection; use gloves only when they do not create an entanglement or loss-of-control hazard.
- Move the tool edge across the stone at the recommended angle using controlled strokes, keeping fingers clear of the edge.
- Clean away abrasive residue and inspect the tool edge carefully after sharpening.

Storage

- Clean and dry the stone as recommended and allow any used lubricant to drain safely.
- Store in a protective holder or case in a dry place away from impact and contamination.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
