Sleeve Board

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Sleeve board

What it is used for

To support narrow garment areas such as sleeves and cuffs during pressing and ironing.

How to handle

- Inspect the sleeve board surface, padding, cover, and support legs for damage or instability.
- Place the board on a stable, heat-resistant work surface and ensure it cannot slip during use.
- Position the sleeve or cuff over the narrow end and smooth the fabric before pressing.
- Set the iron temperature to suit the fabric and keep fingers clear of the hot soleplate and steam.
- Allow the board to cool before folding or moving it, and remove lint or loose threads after use.

Storage

- Clean the cover and allow the board to cool and dry completely before storage.
- Fold or secure the board according to its design and store in a dry place away from moisture and heavy objects.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
