Smartphone

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: M-health equipments smart phone, tablet phone; Smart phone

What it is used for

A smartphone is used to access learning apps, record information, communicate, and collect digital data. Use it carefully to protect the device, user privacy, and stored information.

How to use

1. Inspect the phone, screen, charging port, and battery for visible damage.
2. Charge the phone using a compatible charger when needed.
3. Unlock the phone and open the required authorized app or function.
4. Enter information carefully and verify readings, images, or saved records.
5. Save work securely and close apps after completing the activity.
6. Lock the screen and disconnect the charger when charging is complete.

⚠ Safety

- Keep the phone and charging cable away from water and wet hands.
- Do not use a phone with a swollen battery or damaged charger.
- Avoid sharing personal information, passwords, or confidential student records.
- Do not use the phone while walking through the lab or operating machinery.

Care & storage

- Clean the screen with a soft, dry microfiber cloth and store the phone securely.
