Soil Scoop

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Soil Scoop

What it is used for

A soil scoop collects small soil samples for observation, testing, and gardening activities. Use it carefully to avoid contamination and injury.

How to use

1. Check the scoop for cracks, rust, loose handles, or sharp damaged edges.
2. Wear suitable gloves and select the required soil sampling location.
3. Push the scoop gently into the soil without excessive force.
4. Collect the required amount and transfer it into a clean labelled container.
5. Remove attached soil and clean the scoop after sampling.

⚠ Safety

- Wear gloves when handling unknown, contaminated, or chemically treated soil.
- Keep fingers away from sharp edges and avoid forceful twisting.
- Do not touch your face or eat while collecting soil samples.

Care & storage

- Dry the scoop thoroughly and store it in a clean, dry place.
