Solar Power Bank

Category: **Solar, Power & Energy** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Solar power bank

What it is used for

A solar power bank stores electrical energy for charging compatible devices. Use suitable sunlight and compatible connections to prevent damage and overheating.

How to use

1. Inspect the power bank, casing, ports, cable, and battery for damage.
2. Read the device instructions and check its charging capacity and compatibility.
3. Place the solar panel in direct sunlight according to the manufacturer's instructions.
4. Connect a compatible device using the correct charging cable.
5. Check charging indicators and disconnect the device when charging is complete.
6. Store the power bank safely after use.

⚠ Safety

- Keep ports and connectors dry and protect the device from rain.
- Do not expose the power bank to excessive heat or open flames.
- Stop using it if the battery swells, leaks, or becomes unusually hot.

Care & storage

- Keep the solar panel clean and store the power bank in a cool, dry place.
