Stadiometer

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Height measuring rod; Height Measuring Scale

What it is used for

A stadiometer measures a person's standing height using a vertical scale and headpiece. Use correct posture and positioning for a reliable reading.

How to use

1. Place the stadiometer on a stable, level surface and check its alignment.
2. Ask the person to remove shoes and bulky headwear, if appropriate.
3. Position the person upright with heels together and feet flat.
4. Align the head in a level position and ask the person to stand naturally.
5. Lower the headpiece gently until it touches the top of the head.
6. Read the scale at eye level and record the height with units.
7. Help the person step away and clean contact surfaces as needed.

⚠ Safety

- Ensure the base is stable and the measuring rod cannot tip over.
- Lower the headpiece gently and never press down on the person's head.
- Provide assistance to anyone who may have difficulty standing safely.

Care & storage

- Clean contact surfaces regularly and store the stadiometer upright in a secure place.
