Video Conferencing System

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Video conferencing tools; Videoconferencing units

What it is used for

A video conferencing system enables remote audio and video communication for lessons, meetings, and demonstrations. Use the correct settings and protect participants' privacy during sessions.

How to use

1. Check the camera, microphone, speakers, display, cables, and network connection.
2. Place the camera securely and position the microphone for clear sound.
3. Connect the system to power and the approved network or computer.
4. Open the authorized conferencing application and select the correct audio and video devices.
5. Test the microphone, speakers, camera, and screen sharing before the session.
6. Join the scheduled session and mute the microphone when not speaking.
7. End the meeting, sign out if required, and switch off equipment safely.

⚠ Safety

- Obtain permission before recording or sharing participants' images, voices, or screens.
- Do not share meeting links, passwords, or confidential information publicly.
- Keep cables secured to prevent trips and electrical hazards.
- Use only approved applications and avoid opening unknown links during sessions.

Care & storage

- Clean camera and display surfaces with suitable materials and store accessories neatly.
