Walker

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Walker

What it is used for

A walker provides support and improves stability for a person who has difficulty walking. Select the correct type and height, and use it according to professional guidance.

How to use

1. Inspect the frame, handles, rubber tips, wheels, and adjustment locks for damage.
2. Adjust the walker to the recommended height with all locks secured.
3. Place the walker on a stable surface and stand upright with assistance if needed.
4. Move the walker a short distance forward while keeping all required contact points stable.
5. Step forward carefully into the walker without leaning excessively on the frame.
6. Turn slowly using small steps and ask for assistance when necessary.
7. After use, park the walker securely and report any defects.

⚠ Safety

- Use a walker suited to the person's mobility and follow healthcare professional guidance.
- Do not use a walker with loose locks, damaged tips, or unstable wheels.
- Avoid stairs, slippery floors, and uneven surfaces unless specifically trained and supported.
- Provide assistance if the user feels dizzy, weak, or unsteady.

Care & storage

- Clean handles and frame regularly, inspect rubber tips, and store the walker in a dry place.
