Weeding Hook

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Weeding Hook

What it is used for

A weeding hook removes weeds and loosens soil around plants in gardens and school plots. Use controlled movements to protect plant roots and avoid injuries.

How to use

1. Inspect the hook, handle, and joint for cracks, looseness, or rust.
2. Wear suitable gloves and closed footwear before starting work.
3. Identify weeds and check nearby plants before inserting the hook.
4. Grip the handle firmly and loosen weeds using short, controlled movements.
5. Pull out weeds carefully without damaging nearby roots or stems.
6. Remove soil and plant debris from the hook after use.

⚠ Safety

- Keep the sharp hook away from hands, feet, and other people.
- Do not swing the tool or use excessive force in hard soil.
- Avoid handling unknown thorny or irritating plants with bare hands.

Care & storage

- Clean and dry the hook, then store it with the sharp end protected.
