Wheel Hoe

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Wheel hoe

What it is used for

A wheel hoe cuts weeds and loosens surface soil using a rolling wheel and blade. Operate it on suitable ground with controlled movement and clear visibility.

How to use

1. Inspect the wheel, blade, handle, fasteners, and guards for damage.
2. Wear closed footwear and suitable gloves before using the tool.
3. Clear stones, wires, and debris from the working area.
4. Hold the handles firmly and position the blade near the weeds.
5. Push the wheel hoe steadily along the row while avoiding crop stems.
6. Stop before turning, removing debris, or adjusting the blade.
7. Clean the blade and wheel after finishing the task.

⚠ Safety

- Keep hands and feet away from the blade and moving wheel.
- Do not use the tool on steep, slippery, or unstable ground.
- Never clear tangled weeds while the tool is moving.

Care & storage

- Remove soil and plant debris, dry metal parts, and store the tool securely.
