Wheelbarrow

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Wheelbarrow or Garden Cart

What it is used for

A wheelbarrow transports soil, tools, plants, and other materials around the garden or workshop. Load it evenly and move it carefully to prevent tipping and strain.

How to use

1. Inspect the tray, wheel, handles, axle, and supports for damage.
2. Wear closed footwear and plan a clear route before loading.
3. Place the load evenly and keep it within the recommended capacity.
4. Grip both handles firmly and lift using a stable posture.
5. Push the wheelbarrow slowly while watching the path and load balance.
6. Stop on level ground before unloading materials carefully.
7. Remove soil and debris and park the wheelbarrow securely.

⚠ Safety

- Do not overload the wheelbarrow or stack materials above a stable height.
- Keep fingers and feet clear of the wheel, axle, and tipping tray.
- Use assistance for heavy loads and avoid steep or slippery routes.

Care & storage

- Clean and dry the tray, check tyre condition, and store it in a stable place.
