Zipper Guide

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 2 labs

Covers these lab items: Zipper Guide

What it is used for

A zipper guide helps align fabric and zipper components during sewing or installation. Use the guide suited to the sewing method and zipper type.

How to use

1. Inspect the guide for cracks, burrs, or loose attachment points.
2. Select a guide compatible with the zipper and sewing machine or hand-sewing setup.
3. Position the zipper and fabric according to the guide instructions.
4. Secure the guide without obstructing the needle, presser foot, or zipper slider.
5. Test alignment slowly on scrap fabric before sewing the actual piece.
6. Remove the guide after sewing and check the zipper movement.

⚠ Safety

- Keep fingers away from the sewing needle and moving machine parts.
- Switch off the sewing machine before installing or adjusting the guide.
- Do not force fabric or zipper teeth through a misaligned guide.

Care & storage

- Remove lint and loose threads and store the guide in a dry container.
