3D Scanner

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: 3D Scanners

What it is used for

A 3D scanner captures an object's shape and surface details to create a digital model. Use the scanner and its software according to the equipment instructions.

How to use

1. Inspect the scanner, cables, lens, and accessories for damage.
2. Place the object on a stable surface and prepare it as instructed.
3. Connect the scanner to a compatible computer and open the approved software.
4. Select the appropriate scanning mode and configure the required settings.
5. Move or position the scanner around the object as instructed while maintaining suitable distance.
6. Review the captured model and repeat scanning where details are missing.
7. Save the file in the required format and clean the equipment after use.

⚠ Safety

- Do not stare into scanner lasers or light sources when warnings prohibit exposure.
- Keep cables secured and avoid moving the scanner abruptly near the object.
- Do not scan people or confidential items without appropriate permission.

Care & storage

- Clean the scanner lens with approved materials and store the equipment in its protective case.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
