Adda Frame

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Adda Frame

What it is used for

An adda frame holds fabric stretched for embroidery, stitching, or decorative textile work. Set it up securely so the fabric remains stable without being damaged.

How to use

1. Inspect the frame, joints, supports, and fasteners for damage or looseness.
2. Place the frame on a stable surface or secure it in its intended stand.
3. Position the fabric evenly across the frame without twisting it.
4. Tighten the frame gradually until the fabric is firm but not overstretched.
5. Check that the working area is well lit and comfortably positioned.
6. Work with suitable needles and tools while keeping the fabric secure.
7. Release the fabric gently and dismantle the frame after finishing if needed.

⚠ Safety

- Keep sharp needles, scissors, and tools away from the face and fingers.
- Do not overtighten joints or lean heavily on the frame.
- Secure the frame to prevent slipping or tipping during use.

Care & storage

- Remove dust and loose threads, wipe the frame dry, and store it in a clean place.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
