Adhesive Mixing Tool

Category: **Hand Tools - Cutting & Shaping** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Adhesive preparation and mixing tools

What it is used for

An adhesive mixing tool combines compatible adhesive components into a uniform mixture. Use the correct tool and follow the adhesive manufacturer's mixing instructions.

How to use

1. Read the adhesive label and identify required components, proportions, and mixing time.
2. Wear the gloves, goggles, and other PPE specified for the adhesive.
3. Select a clean, compatible mixing container and suitable mixing tool.
4. Measure each component accurately and add them in the specified order.
5. Mix slowly and thoroughly, scraping the container sides when appropriate.
6. Use the mixture within its stated working time and clean tools as instructed.

⚠ Safety

- Work in a well-ventilated area and avoid inhaling fumes or dust.
- Avoid skin and eye contact with adhesive and hardener components.
- Never mix unknown chemicals or use food containers for adhesive preparation.
- Follow product instructions for spills, disposal, and emergency exposure.

Care & storage

- Clean or dispose of mixing tools according to the adhesive instructions and local waste rules.
