Ankle Weights

Category: **Beauty, Wellness & Fitness** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Ankle/Wrist Weights

What it is used for

Ankle and wrist weights add resistance during selected fitness exercises. Choose a suitable weight and use controlled movements to avoid joint strain.

How to use

1. Inspect the weight straps, fasteners, and outer covering for damage.
2. Select a light, suitable weight based on the exercise and ability level.
3. Secure the weights comfortably around the ankles or wrists without restricting circulation.
4. Begin with gentle movements and maintain correct posture throughout the exercise.
5. Stop and remove the weights if movement becomes uncomfortable or difficult.
6. Remove the weights after exercising and check the skin for irritation.

⚠ Safety

- Do not wear weights that cause numbness, pain, or restricted circulation.
- Avoid running, jumping, or fast movements unless a qualified instructor approves them.
- Keep straps secured and away from moving exercise equipment.

Care & storage

- Wipe weights clean after use and store them dry with straps fastened loosely.
