Arrow

Category: **Sports & Physical Education** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Arrows

What it is used for

An arrow is a projectile designed for use with a compatible bow in supervised archery activities. Handle arrows carefully and follow the range rules at all times.

How to use

1. Inspect the shaft, point, fletching, and nock for cracks or damage.
2. Use only arrows compatible with the bow and approved for the activity.
3. Follow the instructor's commands and stand behind the designated shooting line.
4. Point the arrow only toward the approved target within the range.
5. Shoot only when the range is declared clear and the target area is safe.
6. Wait for the signal before retrieving arrows and check them again afterward.

⚠ Safety

- Never point an arrow at a person, even as a joke.
- Never shoot upward, toward an unknown area, or beyond the target zone.
- Do not use cracked, bent, or damaged arrows.
- Only retrieve arrows when the instructor confirms shooting has stopped.

Care & storage

- Wipe arrows clean, keep points protected, and store them securely in a suitable quiver or case.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
