Automatic Waterer

Category: **Animal Husbandry & Dairy** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Bell Type Automatic Waterer

What it is used for

An automatic waterer supplies drinking water to animals as the water level changes. Check its water supply, valve, and cleanliness before allowing animals to use it.

How to use

1. Inspect the bowl, valve, float mechanism, pipes, and fittings for damage or leaks.
2. Clean and rinse the drinking surface using an animal-safe method.
3. Connect the water supply according to the equipment instructions.
4. Open the supply gradually and check that the valve controls the water level correctly.
5. Check that water flows freely and the bowl does not overflow.
6. Allow animals access only after confirming clean water and stable installation.
7. Close the supply before maintenance and clean the unit regularly.

⚠ Safety

- Never allow animals to drink water contaminated with chemicals or cleaning products.
- Keep electrical equipment away from water unless suitably protected.
- Repair leaks and unstable fittings before use.

Care & storage

- Clean the bowl routinely and inspect the valve, float, and water lines for blockages.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
