# Balance Beam

Category: **Sports & Physical Education** Type: **Short SOP** Priority: **Medium** 1 labs

**Covers these lab items:** Balance Beam Set

## What it is used for

A balance beam develops balance, coordination, and controlled movement during physical education. Use the beam at a suitable height with adequate supervision and a clear landing area.

## How to use

1. Inspect the beam surface, supports, joints, and fasteners for damage.
2. Set up the beam on a level, non-slip surface with a clear surrounding area.
3. Check that all supports are locked and the beam does not wobble.
4. Warm up and wait for the instructor's instructions before starting.
5. Step onto the beam carefully and move slowly with eyes focused ahead.
6. Step down at the designated end and allow the next participant to begin.
7. Return portable components to storage after checking the equipment.

## ⚠ Safety

- Use mats and instructor supervision appropriate to the beam height and activity.
- Do not run, push others, or perform unapproved stunts on the beam.
- Stop using the beam if it slips, wobbles, or becomes damaged.

## Care & storage

- Wipe the surface clean and store removable components in a dry, secure place.

*Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.*
