Balance Board

Category: **Beauty, Wellness & Fitness** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Balance Board

What it is used for

A balance board challenges balance and coordination by creating an unstable standing surface. Begin with supported exercises and use it only on a clear, non-slip floor.

How to use

1. Inspect the board, base, and surface for cracks, wear, or loose parts.
2. Place the board on a level, non-slip surface away from sharp edges.
3. Stand near a stable support or instructor before stepping onto the board.
4. Place both feet evenly and keep knees slightly bent.
5. Shift weight gently while maintaining control and looking ahead.
6. Step off slowly and rest if balance becomes difficult.
7. Wipe the board clean and return it to storage after use.

⚠ Safety

- Use supervision or nearby support if you are new to balance training.
- Do not use the board on wet floors or near stairs.
- Stop immediately if you feel pain, dizziness, or loss of control.

Care & storage

- Clean the board with a suitable cloth and store it dry away from direct sunlight.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
