Ball Pump

Category: **Sports & Physical Education** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Exercise Ball Pump

What it is used for

A ball pump inflates compatible sports or exercise balls using a pump and suitable needle or nozzle. Use the correct attachment and follow the ball's recommended pressure.

How to use

1. Inspect the pump, hose, connector, and inflation needle or nozzle for damage.
2. Check the ball's valve type and recommended inflation pressure.
3. Attach the correct needle or nozzle securely to the pump.
4. Moisten the needle if the ball manufacturer recommends it and insert it gently.
5. Pump steadily while checking firmness or pressure with a suitable gauge.
6. Stop at the recommended pressure and withdraw the needle carefully.
7. Remove the attachment and store the pump after use.

⚠ Safety

- Do not force the needle into the valve or use a bent needle.
- Avoid overinflating the ball beyond its recommended pressure.
- Keep the needle pointed away from fingers and eyes.

Care & storage

- Clean the pump and attachment and store the needle in a protective holder.
