Bamboo Knife

Category: **Hand Tools - Cutting & Shaping** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Bamboo Knife

What it is used for

A bamboo knife cuts or trims bamboo during craft and workshop activities. Use it only with proper training, a stable workpiece, and controlled cutting movements.

How to use

1. Inspect the blade, handle, and fastening points for damage or looseness.
2. Wear suitable eye protection and cut-resistant protection where appropriate.
3. Secure the bamboo on a stable work surface using a suitable clamp.
4. Hold the knife firmly and cut away from your body using controlled strokes.
5. Keep the supporting hand outside the blade path at all times.
6. Place the knife safely down before repositioning the bamboo or clearing offcuts.
7. Clean the blade and store the knife with its edge protected.

⚠ Safety

- Never cut toward your body or hold bamboo in your palm while cutting.
- Keep the blade away from fingers and other people.
- Do not use a loose, cracked, or damaged knife.
- Only trained and supervised students should use sharp bamboo knives.

Care & storage

- Wipe the blade dry after use and store it in a secure protective sheath.
