Blood Cell Pipette

Category: **Laboratory Instruments & Glassware** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: WBC Pipette

What it is used for

A blood cell pipette measures and transfers small quantities of blood or diluting fluid for laboratory procedures. Handle it carefully and follow the laboratory's approved method.

How to use

1. Inspect the pipette for cracks, chips, blocked openings, or damaged markings.
2. Wear laboratory coat, gloves, and eye protection as required.
3. Use the specified pipette aid and never draw blood by mouth.
4. Collect or transfer the required liquid according to the approved laboratory procedure.
5. Avoid air bubbles and read the marked volume at eye level.
6. Dispose of contaminated tips or pipettes in the designated biohazard container.
7. Clean or disinfect reusable equipment according to laboratory instructions.

⚠ Safety

- Treat all blood samples as potentially infectious and avoid direct contact.
- Never pipette by mouth or use a cracked pipette.
- Handle broken glass with suitable tools, never bare hands.

Care & storage

- Store clean reusable pipettes in a protective holder and dispose of single-use types appropriately.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
