Bluetooth Device

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Bluetooth

What it is used for

A Bluetooth device connects compatible electronics wirelessly over a short distance. Pair devices securely and check that the connection suits the intended activity.

How to use

1. Check that both devices support compatible Bluetooth functions.
2. Switch on Bluetooth on the required devices and keep them nearby.
3. Open the Bluetooth settings and select the correct device name.
4. Confirm the pairing request or code on both devices when prompted.
5. Test the connection by playing audio or transferring an approved file.
6. Disconnect or unpair devices when the activity is finished.

⚠ Safety

- Pair only with trusted devices and avoid unknown pairing requests.
- Do not transfer confidential information over an untrusted connection.
- Keep device volume at a safe level when using headphones or speakers.

Care & storage

- Keep devices charged, dry, and updated, and remove old pairings when no longer needed.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
