Boat

Category: **Animal Husbandry & Dairy** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Droni

What it is used for

A boat or droni is a watercraft used for approved activities on water. Operate it only with suitable supervision, safety equipment, and knowledge of local water conditions.

How to use

1. Inspect the hull, seating, oars or motor, and safety equipment for damage.
2. Check weather, water conditions, permitted access, and the planned route before departure.
3. Ensure every occupant has a correctly fitted life jacket.
4. Load passengers and equipment evenly without exceeding the boat's capacity.
5. Launch and operate the boat under the direction of a qualified supervisor.
6. Keep clear of obstacles and follow instructions throughout the activity.
7. Return safely, secure the boat, and inspect it after use.

⚠ Safety

- Never enter the watercraft without appropriate flotation equipment and supervision.
- Do not overload the boat or operate it in unsafe weather.
- Keep clear of propellers, deep water, and other moving watercraft.
- Follow local boating rules and emergency procedures.

Care & storage

- Rinse and dry the boat after use and store it securely as instructed.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
