Bobbin Case

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Bobbin case

What it is used for

A bobbin case holds the bobbin and helps feed lower thread in a sewing machine. Install the correct case and check thread movement before sewing.

How to use

1. Switch off the sewing machine before opening the bobbin area.
2. Remove the bobbin case and inspect it for lint, damage, or distortion.
3. Insert the correctly wound bobbin in the direction specified by the machine.
4. Guide the thread through the case slot and tension spring as instructed.
5. Fit the bobbin case securely into its holder.
6. Turn the handwheel slowly to check thread movement before sewing.
7. Close the bobbin cover and test stitching on scrap fabric.

⚠ Safety

- Keep fingers away from the needle and moving machine parts.
- Never remove or adjust the bobbin case while the machine is running.
- Do not force an incompatible or damaged bobbin case into place.

Care & storage

- Remove lint with a suitable brush and store spare cases in a clean container.
