Breeding Tank

Category: **Animal Husbandry & Dairy** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Plastic or glass breeding tanks

What it is used for

A breeding tank provides a controlled environment for approved aquatic breeding or observation activities. Maintain suitable water conditions and follow species-specific care instructions.

How to use

1. Inspect the tank, seams, stand, lid, and fittings for cracks or leaks.
2. Clean and rinse the tank using a method safe for the intended species.
3. Set up suitable water, filtration, aeration, and temperature controls as required.
4. Allow the system to stabilize and check water conditions before introducing organisms.
5. Introduce only approved, compatible organisms according to the care plan.
6. Observe water quality, animal behaviour, and equipment function regularly.
7. Remove waste safely and clean the tank according to the maintenance schedule.

⚠ Safety

- Never use tanks containing cleaning chemical residue or unsuitable water.
- Handle aquatic organisms gently and follow hygiene precautions after contact.
- Keep electrical pumps and heaters protected from splashes and water leaks.
- Do not release captive organisms into natural waterways.

Care & storage

- Remove waste regularly, monitor water conditions, and inspect the tank for leaks.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
