Camera Trap

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Camera traps for observing wildlife without human interference

What it is used for

A camera trap records images or video when its motion or heat sensor detects activity. Install it responsibly to observe wildlife while minimizing disturbance and protecting privacy.

How to use

1. Inspect the camera housing, lens, sensor, batteries, and mounting strap.
2. Choose a suitable location based on the observation purpose and permitted access.
3. Mount the camera securely at an appropriate height and angle.
4. Set date, time, sensor sensitivity, and recording mode according to the instructions.
5. Test detection and framing before leaving the camera unattended.
6. Retrieve the camera and review recordings at the planned interval.
7. Switch off the device before changing batteries or removing the memory card.

⚠ Safety

- Do not approach dangerous wildlife or disturb nests and breeding areas.
- Obtain permission before placing cameras on private or restricted land.
- Avoid recording people in private spaces and follow local privacy rules.
- Keep batteries and small parts away from children and animals.

Care & storage

- Clean the lens and sensor gently and store the camera dry with batteries handled as instructed.
