Chick Box

Category: **Animal Husbandry & Dairy** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Chick box

What it is used for

A chick box provides temporary housing and transport space for young chicks. Maintain suitable ventilation, warmth, cleanliness, and stocking density according to animal-care guidance.

How to use

1. Inspect the box, lid, ventilation openings, and base for damage.
2. Clean and dry the box using a method safe for chicks.
3. Prepare suitable bedding and ensure ventilation openings remain unobstructed.
4. Check the temperature and arrange a safe heat source if required.
5. Place chicks gently inside without overcrowding and secure the lid appropriately.
6. Monitor chick behaviour, warmth, and ventilation throughout use.
7. Remove bedding and waste safely and clean the box after use.

⚠ Safety

- Never block ventilation openings or expose chicks to excessive heat or cold.
- Keep chicks away from drafts, predators, and contaminated surfaces.
- Handle chicks gently with clean hands and follow hygiene precautions.
- Do not place the box near unprotected heaters or open flames.

Care & storage

- Replace wet bedding promptly and clean and dry the box between uses.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
